Global Recycled Standard

The quality team of Dutch Decor is continuously improving and innovating the production process and obtaining the necessary certifications for our products. We are proud of the fact that we have the first products fully recycled in our Eco Line collection with the Global Recycled Standard label.

We aim to have even more products certified in the future. One way we are doing this is by having our recycled materials comply with the Global Recycled Standard certification. They are intended to check the recycled material in products and to monitor the social, ecological and chemical impact of production. Global Recycled Standard aims to set requirements for the materials used and good working conditions, and to limit the environmental impact as much as possible.

better cotton™ member

Better Cotton Initiative

Part of our cotton is produced according to the guidelines of the Better Cotton Initiative (BCI). BCI is a global non-profit organization and the largest cotton sustainability program in the world. BCI started over ten years ago with the aim of improving global cotton production for both cotton growers and the future of the environmental and cotton sector.

BCI truly supports cotton farmers. The focus is on providing training and learning opportunities for these farmers to adopt more environmentally, socially and economically sustainable production practices.
